

Chateau

The image shows the interior of a motorhome with wood-paneled walls and ceiling. A television is mounted on the wall in the background. In the foreground, there is a kitchen counter with a sink, a wooden cutting board with a salad, and a glass dish of cookies. A patterned sofa and a blue armchair are visible. The floor is covered in blue carpeting. A control panel with various buttons and a numeric keypad is visible on the left side of the image.

Chateau

Whether you just enjoy the great outdoors...or whether you're looking forward to putting a lifetime of work behind you and visiting all the glorious sights our great land has to offer, the Chateau Class C motorhome will let you fulfill your dreams.

If you want a comfortable, dependable way to travel...

If you want beautiful and convenient surroundings...

If you want unique floorplans and generous sleeping space...

If you want strict construction standards...

If you want **QUALITY**...

You want the Chateau Class C Motorhome!

The Chateau's impressive exterior storage features Roto-Cast® storage compartments. These seamless compartments virtually eliminate the possibility of water intrusion. This proven technology also provides a quiet, strong and insulated storage area for all your valued belongings.

CHATEAU INTERIORS

Portfolio Blue

Portfolio Green

Portfolio Taupe

Most models are designed to be manufactured on either a Ford Motor Company or General Motors Chassis. Both chassis' are designed to fully utilize the Four Winds patented E.M.T. (Energy Mount Transfer System.) This proven innovation in chassis design completely isolates the body of the motorhome from the chassis by utilizing a series of carefully placed, heavy-duty, high performance rubber grommets. The E.M.T. system increases road comfort and stability and improves road handling, while virtually eliminating the transfer of vibration and road noise to the interior of the coach. This unique system is another example of Chateau's state-of-the-art technology and superior design and construction.

The Chateau motorhome is now available with a slideout floorplan for added daily living space. This comfortable design also includes overhead storage cabinets in the slide room as an added convenience. Easy to operate, Chateau slideouts are built for reliability and long life and are sure to add even greater value to your motorhome.

Chateau Sport

Like the Chateau, the Chateau Sport is built with high quality and workmanship. The Chateau Sport offers great standard features and is the perfect vehicle for those who prefer a shorter motorhome with greater economy.

The bathrooms are carefully designed for maximum efficiency and convenience, with generous storage and complete privacy.

Most of the bedrooms feature island queen beds with matching bedspreads and window treatments. For extra storage convenience, the bed frames are fitted with gas lift-struts for easy access to the valuable under bed storage compartment.

WARRANTY
 2 year limited structural warranty and
 2 years on major components
The best protection in the RV industry
 See your dealer for all the details.

Product information, specifications and photography in this brochure were as accurate as possible at time of printing. Since we continually strive to improve our products, actual products may differ. Prices and specifications are subject to change without notice. All capacities are approximate and dimensions are nominal. Some features or options may be different or unavailable in Canada.

Vehicle Loading. Every effort has been made to provide the greatest number of options for the recreation vehicle owner. Along with these choices comes the responsibility to manage the loads that are imposed by the choices so that they remain within the manufacturer's specified chassis weight limits. Do not overload the recreation vehicle.

Dry weights based on standard features; optional equipment not included. Net carrying capacity (NCC) determined by subtracting unloaded vehicle weight (UVW) from gross vehicle weight (GVWR) and includes fluids, options and cargo. Liquid capacities and weights are approximations only.
