

**“Quality Construction, Customer Service & Value
We Have It All”**

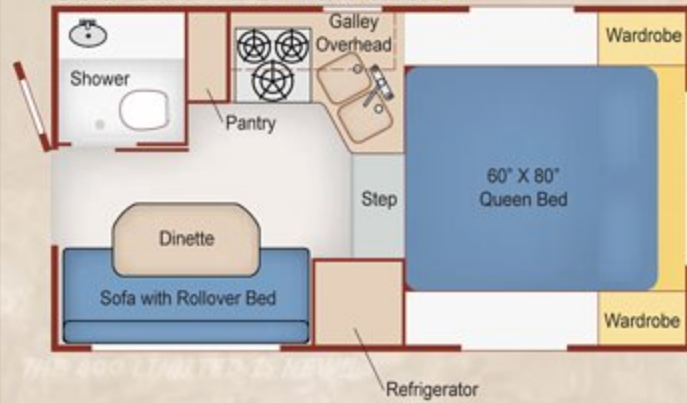

Intermountain RV's 100% Welded Aluminum Frame Construction combined with our Vacuum Bonded Roof, Walls and Floors provide the strongest and lightest campers on the market today.

FIVE MODELS TO CHOOSE FROM WITH A NEW 1050 ON THE WAY

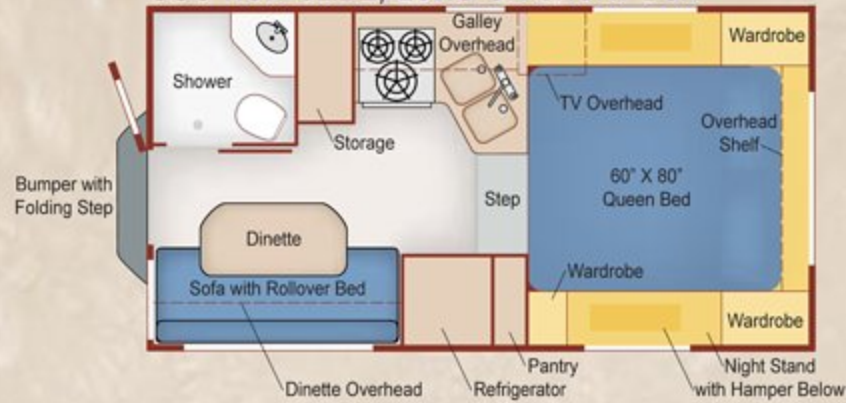

800 LIMITED NON-SLIDE

Estimated Dry Weight = 2,000lbs
Estimated Wet Weight = 2,390lbs

850 NON-SLIDE, LONG OR SHORT BOX

Estimated Dry Weight = 2,250lbs
Estimated Wet Weight = 2,650lbs

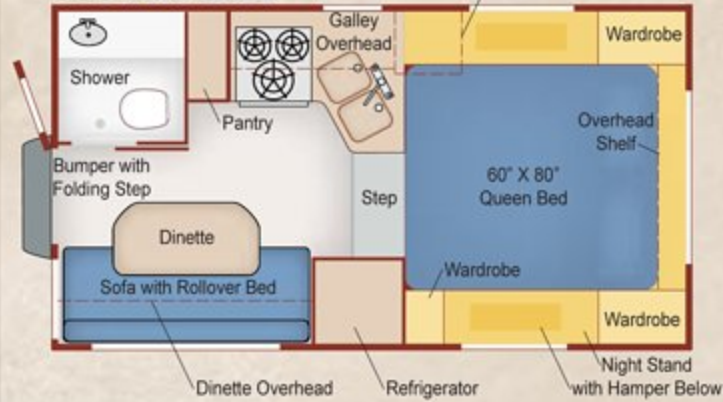

950 NON-SLIDE

Estimated Dry Weight = 2,350lbs
Estimated Wet Weight = 2,750lbs

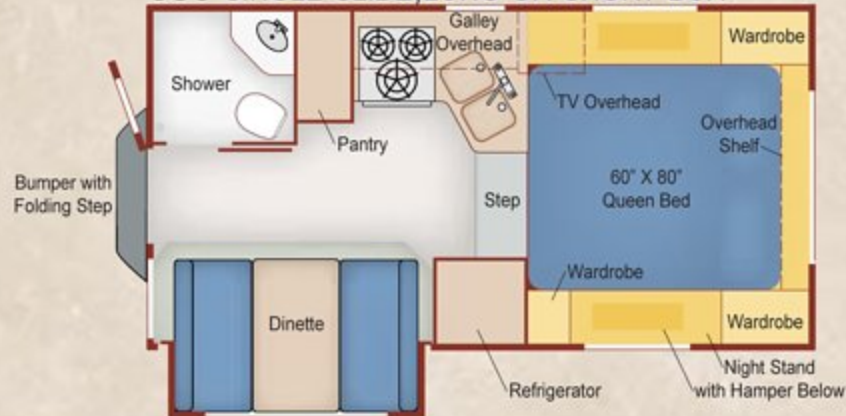

800 NON-SLIDE

Estimated Dry Weight = 2,300lbs
Estimated Wet Weight = 2,690lbs

850 SINGLE SLIDE, LONG OR SHORT BOX

Estimated Dry Weight = 2,400lbs
Estimated Wet Weight = 2,800lbs

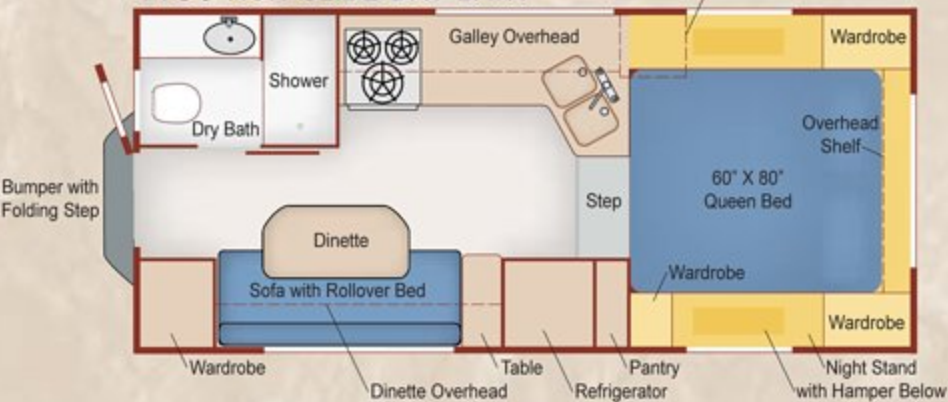

950 SINGLE SLIDE

Estimated Dry Weight = 2,500lbs
Estimated Wet Weight = 2,900lbs

1150 NON-SLIDE DRY BATH

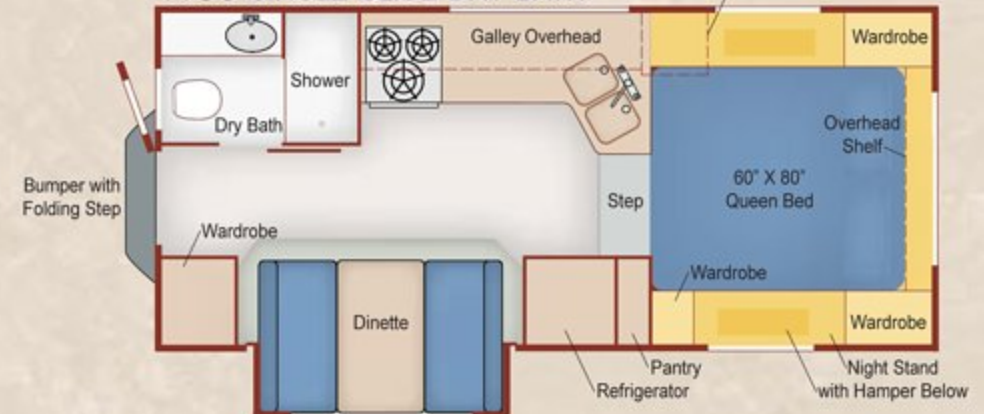

Estimated Dry Weight = 2,850lbs
Estimated Wet Weight = 3,260lbs

Intermountain RV was the first to build an all welded aluminum frame pickup camper, and the rest of the industry has followed our lead.

1150 SINGLE SLIDE DRY BATH

Estimated Dry Weight = 3,000lbs
Estimated Wet Weight = 3,410lbs

INTERMOUNTAIN RV IS PROUD TO PRESENT THE LIGHTEST AND STRONGEST CAMPER LINE IN THE INDUSTRY!

I was up at Mt. St. Helens on Thursday September 7th 2004 and spent the night parked right where you see my Eagle Cap Camper. I thought you may enjoy the picture. I have also done a trip to Reno and San Francisco this year with the dodge P/U and the Eagle Cap Camper. We love it! I talk to people all the time, explaining all of the research I did before buying, and tell them they should definitely check out an Eagle Cap before buying anything else. Have a great Day-

Sincerely,
Tim and Cheryl Hislop
Kelso, WA

At Eagle Cap our goal has always been to provide the best quality truck campers at the best price. We have striven for quality above quantity. This company was started by two guys who knew that the industry was in need of something different, hence the Eagle Cap all Aluminum Framed truck camper was born.

The 2005 model-year series of Eagle Cap has brought significant upgrades to what was already a strong and lightweight product. The use of vacuum-bonded walls, roof, floor, sub-floor, risers and wings has lightened the camper significantly and has improved its strength. Our use of one-piece fiberglass front and rear caps has improved the appearance and the longevity of the product.

We feel that the industry is in need of new and innovative products that maintain a high level of quality. Eagle Cap has a great lineup for 2005 and has one more camper in the works.

We will always strive for the highest possible quality, innovation and excellence, attention to detail, and respect for people. After all, our customers have made us who we are - a company that is here to stay. We love what we do and will always create what we believe to be the best truck camper on the market. Visit us online at: www.eaglecapcampers.com or give us a call at: 541-663-8713. We would like to hear from you.

The same two guys who started this company are still punching the clock today. If you're in the neighborhood stop by our La Grande, Oregon factory for a tour. You may even catch us at one of our famous smoker cooked barbeques.

Most of all, enjoy our new 2005 Eagle Cap line of Truck Campers. We do!

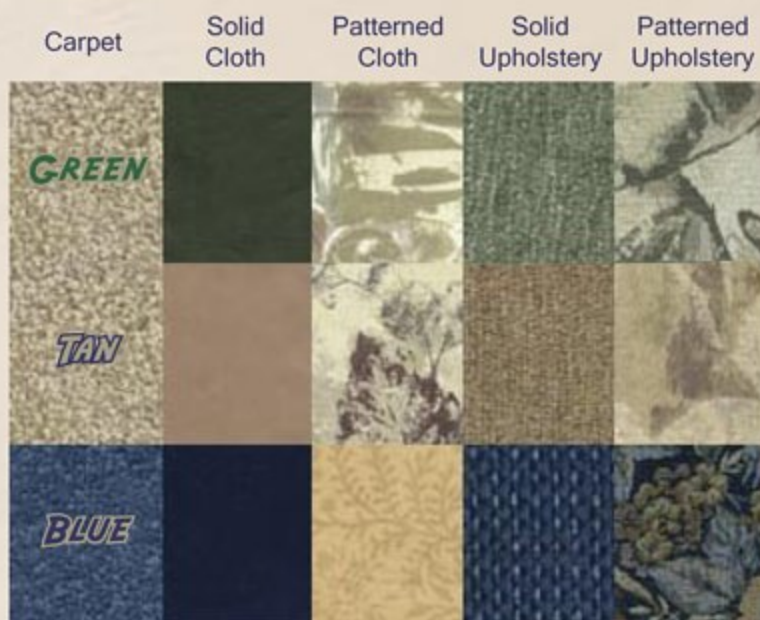

New for 2005 is our 800 Limited, a replacement for the 800 Lite. It is quite possibly the lightest, hard-sided, all aluminum-framed, full-basement, heated tank, heavily insulated 8-foot camper on the market. 'Whew' that was a mouthful! As an improvement to last year's model we have raised the ceiling height above the bed, incorporated the same front and rear caps, added large capacity tanks and other innovations while keeping the dry weight at 2000 Lbs. If you are looking for light-weight, this is the best of the best. It will fit on long or short box pickups.

Our 800 model bumps you up a step into a camper with full sized appliances and a lot more storage. It comes standard with a very comfortable and easy to use roll-over couch for increased floor-space. This camper will also fit on long or short box pickups.

The 850 adds even more living space by incorporating a dinette slide-out and a larger bathroom. Not only will this model fit a long or short box pickup but with the "Short Box Option" you can add a generator and more outside storage.

Our best selling model is the 950 and comes with or without a slide-out. It is designed for a long box pickup and boy does that give you more space. With a deluxe pantry next to the refrigerator the kitchen becomes very user-friendly. Not to mention the extra storage elsewhere both inside and out.

Now for the cream of the crop. Possibly the lightest camper in its class the 1150 weighs in at a wonderful 2900 Lbs. This camper is also designed for a long box and has the option to delete the slide-out. We have incorporated a large dry-bath and a very open feel due to the extra length. Oh, and we must mention the very large galley area. It is a truck camper cook's dream.

INTERMOUNTAIN RV PROVIDES A FULL 2 YEAR WARRANTY FROM THE DATE OF PURCHASE AGAINST DEFECTS IN MATERIALS AND WORKMANSHIP. INDIVIDUAL MANUFACTURER'S WARRANTIES COVER SEPARATE APPLIANCES AND COMPONENTS USED ON OUR PRODUCT. CONSULT YOUR DEALER OR WARRANTY CARD SUPPLIED IN THE WARRANTY PACKET FOR DETAILS. ALL SPECIFICATIONS, EQUIPMENT AND PRICES ARE SUBJECT TO CHANGE WITHOUT PRIOR NOTICE. PRODUCTION OF SPECIFIC MODELS IS SUBJECT TO SEASONAL SCHEDULING DEMANDS. INTERMOUNTAIN RV RESERVES THE RIGHT TO IMPROVE MODELS WITHOUT INCORPORATING THESE CHANGES TO MODELS PROVIDED EARLIER. CONSULT YOUR LOCAL TRUCK AND RV DEALERS TO ASSURE A SAFE AND PROPER MATCH BETWEEN YOUR TRUCK AND AN EAGLE CAP CAMPER.
