

ADRENALINE

TOY HAULERS

BACKED BY MORE THAN 50 YEARS OF RV MANUFACTURING, COACHMEN'S ALL-NEW ADRENALINE TOY HAULER LINEUP IS DESIGNED FOR TODAY'S OUTDOOR ENTHUSIAST.

Coachmen
Leader to the Great Outdoors.

26CB | LIVING

26CB | BEDROOM

WE'VE LISTENED

Your feedback was the driving force in the design of our product. More storage. More drawers. Comfortable seating areas. Larger beds. Lighter colored wood. More room to fit your toys and hobbies. These are just a few of the many features you will find in the Adrenaline Toy Hauler lineup.

19CB | LIVING

25QB | GARAGE

25QB | BEDROOM

YOU WANTED MORE STORAGE

The 25QB features an abundant amount of storage space with overhead cabinets, pantries and linen closets. Additionally, the bedroom invites you to relax in a spacious 60" x 80" queen walk around bed with three wardrobes and drawers underneath.

25QB | BATH

FUNCTIONAL BY DESIGN

Like the rest of the Adrenaline lineup, the 30QBS is a perfect blend of quality, functionality, and looks! From the double entry bedroom to the 12' 6" separated garage, this floorplan is packed with amenities in all the right places.

Forest River, Inc. encourages our customers to purchase their Forest River products from a local dealership whenever possible for the following reasons:

- 1) Forest River, Inc. dealers are independently owned and operated businesses so priority service and scheduling is at their discretion and is often provided to customers that purchased their unit at that dealership.
- 2) Purchasing locally allows customers to establish meaningful relationships with a dealer, enhancing the RV experience through assistance with product questions, user tips or RV regulations for your state or country, and much more!
- 3) Canadian customers must meet requirements to bring an RV purchased out of the country to their home. These requirements may involve additional inspections and certifications, taxes and fees. Your local Canadian Dealer is a professional at meeting these requirements.
- 4) Scheduling timely warranty repairs and adjustments through a local dealership provides far greater flexibility and convenience to you, the customer!

It is the goal of Forest River, Inc. that all of our RV owners fully enjoy the RV experience and that customer satisfaction meets or exceeds their expectations!

PRE-DELIVERY INSPECTION FACILITY

20,000 square feet of quality assurance. The bare essentials for a premium product. This state-of-the-art facility gives immediate daily feedback to production for quality assurance in every unit built.

Specification Definitions

GVWR (Gross Vehicle Weight Rating) - is the maximum permissible weight of the unit when fully loaded. It includes all weights, inclusive of all fluids, cargo, optional equipment and accessories. For safety and product performance do NOT exceed the GVWR.

GAWR (Gross Axle Weight Rating) - is the maximum permissible weight, including cargo, fluids, optional equipment and accessories that can be safely supported by a combination of all axles.

UVW (Unloaded Vehicle Weight)* - is the

typical weight of the unit as manufactured at the factory. It includes all weight at the unit's axle(s) and tongue or pin and LP Gas. The UVW does not include cargo, fresh potable water, additional optional equipment or dealer installed accessories.

*Estimated average based on standard build optional equipment.

CCC (Cargo Carrying Capacity)** - is the amount of weight available for fresh potable water, cargo, additional optional equipment and accessories. CCC is equal to GVWR minus UVW. Available CCC should accommodate fresh potable water (8.3 lbs per gallon). Before filling the fresh water tank,

empty the black and gray tanks to provide for more cargo capacity.

** Estimated average based on standard build optional equipment

Each Forest River RV is weighed at the manufacturing facility prior to shipping. A label identifying the unloaded vehicle weight of the actual unit and the cargo carrying capacity is applied to every Forest River RV prior to leaving our facilities.

The load capacity of your unit is designated by weight, not by volume, so you cannot necessarily use all available space when loading your unit.
