MAKING THE RIDE **EVEN SMOOTHER**

Our family is proud to stand behind every Entegra Coach we build. In fact, our coverage is so comprehensive, we invite you to compare it to that of other manufacturers—we think you'll find we're in it for the long haul.

The Entegra Coach limited warranty covers your coach for two years, or the first 24,000 miles of use, whichever occurs first. For more information, visit EntegraCoach.com.

THE QUIETEST RIDING, BEST HANDLING COACH ON THE MARKET TODAY. PERIOD.

HERE'S WHY

1. SPARTAN® CHASSIS

Every Spartan® chassis comes with a best-in-class 3-year/50,000-mile transferable warranty, with no deductibles. Spartan® chassis also boasts an industry-best, 20-year transferable warranty on the frame as well as a Cummins® 5-year/100,000-mile engine warranty and an Allison® 5-year/200,000-mile transmission warranty.

2. EXCLUSIVE X-BRIDGE™ FRAME

Our exclusive X-Bridge™ frame adds even more floor strength and structural rigidity, eliminating chassis flex and twisting; with it, the suspension—not the chassis—absorbs road shock and vibration.

3. FIVE-INCH-THICK FLOORS

The industry's thickest floor starts with a 3/4" 7-ply plywood for dramatic reductions in energy transmission, noise and vibration. Cabinets are screwed directly to the wood and tile is laid precisely around them; other manufacturers place cabinets on top of the tile, causing squeaks or cracking.

4. RESIDENTIAL-STYLE WALLS AND ROOF

Our roof combines crowned aluminum truss rafters on 16" centers with Flexfoil®, fiberglass insulation and 3/8" plywood decking. Our sidewalls and rear cap are the ONLY triple-insulated walls on the market. Featuring Styrofoam™, Flexfoil® and glued batt insulation, our triple-insulated walls keep the coach quiet, and you comfortable, on the inside.

5. E-Z STEER™ ADJUSTABLE POWER STEERING ASSIST

The E-Z Steer system engages during turns and specific highway driving conditions to assist drivers when it's needed most. With E-Z Steer, turning requires less effort, even at low speeds, to make longer drives more enjoyable, engaging the rear tag axle in coordination with the front wheels makes turns 15-20% tighter, turning the wheel at a dead stop makes pulling in and out of campsites or storage easier and handling is vastly improved in high crosswinds.
