

Finally, a real hard-sided truck camper for midsize trucks has been created! The owners of Tacoma, Ranger, Frontier, and Colorado/Canyon celebrate!

SQUIRE 605 TRUCK CAMPER

The Squire brand, produced by Lance Camper Mfg, is making waves with their newest offering. A truck camper ready for the trail with legendary capability, construction, and design for the mid-size truck class. It's time to make all your off-roading dreams come true.

The SQ605 cab-over offers a real queen-size bed. A 70"x36" dinette, which converts to an extra sleeping space, highlights the main camper. Included in the galley is a round sink with residential high-rise faucet, a dual-burner stove, and a 12-volt in-wall refrigerator. The new Squire exclusive innovation, MOLLE (Modular Lightweight Load-carrying Equipment), is located overhead. It consists of panels that not only serve as the cabinet's structure but also provide a large grid for clipping and fastening gear, providing the owner with a multitude of options.

SQUIRE SQ610 TRUCK CAMPER

A full wet bath. A real queen bed. Built light for trucks mid-size and up.

The SQ610 is the lightest fully appointed wet bath truck camper Lance has ever built—designed from the ground up for today's mid-size, half-ton, and larger pickups. It delivers the core comforts serious travelers need, in a streamlined, off-road-ready form factor.

Step through the rear door and enter a space that immediately surprises. To your right, the compact galley is smartly laid out: a round stainless-steel sink, black high-rise faucet, and two-burner cooktop with folding glass cover sit flush into a durable countertop. A tall 12V Euro-style refrigerator provides cold storage without hogging space, and an overhead MOLLE panel lets you mount or organize gear on the fly.

Mid-cabin, the camper opens into a spacious east-to-west dinette. Surrounded by Euro-style windows,

MOLLE-backed cabinet framing, and open sightlines, it's a bright and adaptable area for meals, work, or sleep. A new slide-rail table system adds flexibility—sliding, pivoting, and converting in seconds.

Forward of the dinette is a full 60" x 80" residential-size queen mattress—no corners cut. Windows, reading lights, a vent fan, and USB charging ports round out the cabover sleeping space.

At the rear of the unit lies the SQ610's signature feature: a fully enclosed wet bath, rare in a camper this light. Inside, you'll find a molded sink, shower, towel bar, flush toilet, and roof vent—supported by onboard black, grey, and 20-gallon fresh water tanks.

With Azdel composite walls, a full aluminum frame, and block foam insulation, the SQ610 is built for adventure—with real comfort, real capability, and real Lance-quality construction.

A new truck camper from Americas favorite slide-in manufacturer.

SQUIRE 805 TRUCK CAMPER

A truck camper from our roots. A heritage floorplan. Designed to fit a huge range of trucks at a value.

The 805 harkens back to an easier time. The original layout dates back to the Lance model 200 from the 1960s. We built iterations of the 805 fairly consistently up until 2008. The new configuration has evolved from hundreds, if not thousands, of truck campers before it. A true truck campers, truck camper updated with our most current materials and innovations including fully laminated and CNC cut components with an all-aluminum frame and dual layer Azdel walls.

The goal we achieved with this model was to make a more minimalist space that still has all the necessities while staying super lightweight and with dimensions that allow owners of many different trucks and interests the ability to safely load up and hit the road. It boasts the longest countertop of any of our campers at 6' with a built-in sink and a two-burner cooktop, two drawers and two under sink cabinets. Galley and storage space in any camper is at a premium and instead of building walls and fully faced cabinets and cramming in accents we focused on open space and large windows. Across from the massive countertop you find a large u-shaped dinette to match, above that you find on either side equal length MOLLE (Modular Lightweight Load-carrying Equipment) panels which serve as structure for the cabinet and also offers a huge grid to clip and fasten gear to which allows the owner big possibilities.

SPECIFICATIONS

FOR 6 1/2-FOOT BED 1/2-TON TRUCKS
