Enhanced Electrical System

Discover new levels of freedom with the electrical upgrades found in all 2025 Leisure Travel Vans. The available 540-Ah battery system with standard 3000-W inverter provides plenty of power to keep you comfortable while off-grid, while upgraded components with added touchscreen control panel integrations offer greater convenience, control, and peace of mind during your travels.

Standard 270-Ah Smart Lithium Battery System

Spend more time exploring off-grid with the all-new standard 270-Ah 12-V smart lithium battery. The battery has an internal heating system, allowing it to be charged at lower temperatures, and now features state-of-charge functionality.

Optional 540-Ah 12-V Smart Lithium Battery System

Expand your boondocking capabilities by adding a second 270-Ah smart lithium battery, boosting your Leisure Travel Van's battery system to an impressive 540-Ah.

3000-W Inverter with 150-A Charger

The upgraded standard 3000-W pure sine wave inverter/charger provides ample power for your RV's AC components, such as the air conditioner, microwave, TVs, and more. For added convenience, all interior and exterior electrical outlets are now inverted. The inverter controls have now been integrated into the touchscreen control panel to further simplify the electrical system.

Inverted Truma Aventa Eco Air Conditioner with Soft-Start

The ultra-quiet Truma Aventa air conditioner perfectly balances cooling and humidity while minimizing noise in a contemporary, energy-efficient, low-profile design. New for 2025, the Truma air conditioner now features a soft-start and can run off battery power, providing more flexibility and comfort in remote camping areas.

Updated Multiplex Control System

The Multiplex Wiring Control System makes monitoring and controlling your Leisure Travel Van simple, either from the 7" touchscreen control panel or mobile app. New for 2025, several new components, including the inverter, battery system, solar controller, and surge protector/transfer switch, have been integrated into the system, further simplifying your RV's controls.

Battery Monitoring

See your battery's charge percentage with the new state-of-charge functionality.

Smart MPPT Solar Controller

New for 2025, the updated, more efficient Maximum Power Point Tracking solar controller allows you to conveniently monitor the output of the optional 200-W or 400-W solar panels via the RV's touchscreen control panel or mobile app.

Smart Surge Protector with Transfer Switch

The upgraded smart surge protector with transfer switch protects your LTV from sudden power surges or voltage spikes, as well as automatically transfers AC power sources when required. Best of all, all of this can be conveniently monitored from the touchscreen control panel.

Discontinued

- Standard Leisure Lounge system (On Murphy Bed, FX)
- U-Lounge dinette (On Corner Bed)

* Coming soon.

Preliminary information. Subject to change without notice. Revised June 4, 2024.

All-New Dinette+ System (Unity Corner Bed)

For those looking to travel with more than two, the all-new standard Dinette+ system changes the game for the Unity Corner Bed. The new, extendable dinette benches pull out to create twin beds, large enough for two adults. Alternatively, the provided filler cushion can be used to form a vast 67" x 76" queen bed. Rounding out the new Dinette+ system is a larger picture window, an improved table lift system, and integrated storage cubbies on either side of the slide-out. No need for the extra beds? No problem – utilize the space beneath the benches to store oversized, bulkier items.

Updated Leisure Lounge and Murphy Bed System (Unity FX)

The 2025 Unity FX features the completely redesigned patented Leisure Lounge system featuring upgraded dual reclining chairs, an updated dinette table system, and the much-requested full-time panoramic window, drawing in an abundance of natural light to the coach in both day and night modes.

All-New Optional Leisure Lounge System (Unity Corner Bed)

The Unity Corner Bed model's patented Leisure Lounge design reimagines the standard booth dinette as a versatile relaxation area that easily converts to a dinette with an integrated table. The dual reclining chairs' power footrests and backrests provide next-level comfort, while the large picture window bathes the Unity with an abundance of natural light. Moreover, a new 15 ft³ exterior storage compartment with an adjustable shelf brings the total exterior storage space to an impressive 48 ft³.

Ducted Air Conditioning

New for 2025, all Wonder floorplans feature ducted air conditioning, providing an even flow of cool air throughout the RV. Combined with the quiet and efficient Truma Aventa air conditioner, this new standard feature continues to bring the comforts of home to life on the road in your LTV. The Murphy Bed Lounge and Rear Lounge models also receive an updated, 58" wide baggage compartment underneath the slide-out, perfect for longer items such as golf clubs or fishing rods.
